

# LeaseAccelerator Integration Fabric

Integrate lease accounting with your business

**LeaseAccelerator Integration Fabric allows you to connect to your ERP systems and other critical applications, creating a powerful company-wide business and accounting ecosystem.**

In today's environment of digital transformation, every organization needs to exchange data between mission-critical business applications and systems. When business systems get disconnected or require manual updates, it's hard to get a complete view of what's going on across processes. And, manual data transfer introduces errors and risks.

Integration Fabric is a powerful integration platform that is ready to connect with any business application. Integration Fabric offers real-time API and SFTP integration with proven connectors to satisfy integration requirements of all open systems within your organization.

**Ensure data quality**

**Eliminate manual entry**

**Stay audit-ready**

## Integration Fabric advantages

Real-time connections to General Ledger, Accounts Payable, End-of-term Management and Portfolio solutions

Multi-ERP support with specific integration interfaces with SAP, Oracle and other major ERPs.

SFTP file transfer support. Robust data import from Excel, CSV and XML templates. Integration files generated in XML, Excel, CSV, TSV formats.

### Features

- ✓ Expanded APIs and RESTful APIs functionality
- ✓ Two-way integration
- ✓ Fewer IT resources required
- ✓ Proven connectors
- ✓ ERP-agnostic
