

LeaseConnect

Integrate leasing with every part of your business

Data

is always current across
disparate systems

Stay audit-ready

with always-on
integration

Eliminate manual

input processes and data
transfer errors

LeaseConnect allows you to automatically connect to your ERP systems and other critical applications, creating a powerful company-wide business and accounting ecosystem.

In today's environment of digital transformation, every organization needs to exchange data between mission-critical business applications and systems. When business systems get disconnected or require manual updates, it's hard to get a complete view of what's going on across processes. And, manual data transfer introduces errors and risks.

LeaseConnect is a powerful integration platform, designed for companies that are seeking system-agnostic solutions that can be integrated into any business applications. LeaseConnect offers real-time API and SFTP integration in addition to 1000+ application specific connectors to satisfy integration requirements of all open systems within your organization.

LeaseConnect seamlessly integrates with all the major ERP systems, asset management, real estate management, and property management systems, providing an end-to-end business process that is automated, accurate, informative, reliable, scalable and sustainable.
